

We collect no personal information using our applications.

We do not collect, use, save or have access to any of your personal information within our iOS apps. Our app does not inherently ask for or have access to any such data.

It is possible to configure our applications to send information to 3rd party equipment or network based services - for example sending a temperature reading to an online cloud system, but such configuration requires the configurator of the app to set up this explicitly, and such use is not intended to send any personal or sensitive data.
